About Blaze Bioscience

Blaze Bioscience is a clinical stage company dedicated to developing products that assist physicians in their quest to improve the lives of cancer patients. Blaze was co-founded by Dr. Jim Olson of Fred Hutchinson Cancer Research Center and Heather Franklin, a former senior business executive at ZymoGenetics, Inc. The company is developing Tumor Paint BLZ-100 for high resolution, real-time visualization of cancer during surgery enabling better detection and more complete and precise removal of cancer. Blaze is collaborating with the Fred Hutchinson Cancer Research Center on a platform of Optide-based products with potential in imaging and therapeutic applications.
